

Published in one of our daily papers recently was a formula for the unemployment problem, paste it in your notebook for future reference. Here it is: Each year has 365 days. Eight hours sleep per day knocks out 122 days leaving 243. Eight more hours off work each day account for another 122 days, leaving 121. Take out 52 Sundays and 52 Saturday half holidays and there are only 43 troublesome days left. A daily average of one and a half hours off work for lunch, sickness, etc., leaves 15. A fortnights annual leave leaves one laborious day unaccounted for. That must be Cup Day and nobody works. And thats that.

Heard at the Club.

Geo thinks that the local policeman at Geelong has been there so long that he has been forgotten. His record form is seen every Barwon Regatta Day.

Jimmy thinks that pass out checks are a good thing for any dance. Come on give that to me, eh!

FINANCES:

The following is your account with the Club. As the club have a number of accounts to pay, we would like you to pay your account so that the Club can carry on successfully. THANKS.

WE ARREST
YOUR
ATTENTION

LETS SEE YOU

AND
THE CLUB

ON

SUNDAY MORNING.

ROWING EVENTS.

Saturday, ~~March~~ 6th: Combination eights
on Henley course.
" 13th: V.R.A. Regatta.
20th: Combination Fours
at the Club.

The Combination eights are being held in aid of Prince Henry's Hospital for the Sportsmen's ward. Members who intend competing in this event will find the necessary form at the Clubhouse upon which to inscribe their name.

The events at the V.R.A. Regatta will be told you upon enquiry from the Captain.

Combination Fours are to be held at the Clubhouse and two other clubs will also be entering. We believe that the entry fee for this event will be 1/-. A good afternoon's racing is assured, and every member is asked to come down to the Club on this date. There is to be an attraction for non rowing members, so you just can't stay away. Anyhow, it is your duty to slack the visiting clubs how enthusiastic our members are. We know you won't let the Club down. It is expected to see many members that we have not seen for some time, lets give them a good old welcome.

The Club did not have any successes at Barwon or Ballarat, but those members who made the trip report that the usual good time was had by all.

The Canoe Club report that they are well in the running for another Premier-ship Permant this year.

In the five mile race the club secured first, second, third, and fastest time.

The seven mile was not so successful, third place being our best effort, this crew also secured fastest time.

The five mile winning crews were:

1st: T. Wallis & L. Stevens, (fastest time)

2nd: A. Wiber & E. Pedley.

3rd: V. Smith & W. Glen.

The successful crew in the seven mile were: R. Goulding & F. Allen.

The canoe club have been holding some very successful sprints of late. Several have been on the river and one at Seaforth. Ideal weather conditions prevailed on each occasion, and bathing was easily first favorite. Sprints just like old times.

The attendances at the club on Sunday mornings was expected to improve after the Barwon and Ballarat Regattas, but this has not proved to be the case yet. May we hope to see a bigger and better showing next Sunday. The following is the list of Easter Sunday, we do not expect to see many.

Lets make a feature of the club with good attendances on Sunday mornings, and a chat in the club kitchen before going home for lunch. Quite a number of faces have been missed of late, and quite a lot asked last week "where is Bob Elliott"? We would all like to know, so come on Bob, come down and tell us.

When we tell you that the Clubhouse is now wearing its new-coat, and the plumber has been on the job as well as the painter, we know members will be down to see it.
